Summary — Dynamic Frontend Developer with hands-on experience in building responsive and interactive web applications using HTML, CSS, JavaScript, and React. Skilled in optimizing web performance, ensuring cross-browser compatibility, and creating user-centric designs. Proficient in integrating APIs and currently expanding skills in backend development using the MERN stack .

Training

Kodu - Powered By Dhruina   April 2024– March 2025
Training — Fullstack Developer—Rohtak

– Collaborated on designing and developing responsive user interfaces with HTML, CSS, JavaScript, and React.
– Gained hands-on experience with backend development using Node.js and Express, integrating APIs and building dynamic web applications.
– Optimized website performance and ensured cross-browser compatibility to enhance user experience.
– Gained expertise in version control systems like Git to streamline development workflows and collaborate effectively.

Education

Baba Masthnath University, Rohtak
Masters In Computer Applications —   *2022 - 2024*
Maharishi Dayanand University, Rohtak
Bachelor In Computer Applications —   *2019 - 2022*

Certifications

– **React Hooks Crash Course** - GreatStack (Dec 2024)
– **JavaScript Fundamentals** - GreatStack (Dec 2024)
– **Full Stack Development Certification** - Kodu Powered By Dhruina (2025)
– **JavaScript Fundamentals** - GreatStack (Dec 2024)
– **Developer and Technology Job Simulation** - Forage (Dec 2024)

Skills

Programming Languages
JavaScript, HTML, CSS , C
Libraries/Frameworks
React , Bootstrap
Tools/Platforms
Git, GitHub, VS Code, Postman
Expanding Skills
MongoDB ,Node.js (Learning) , Express.js (Learning)

Projects

Tasty Burger Restaurant App   Demo Link

– Developed a dynamic restaurant application showcasing menus and contact information using React.
– Ensured responsive design principles for a seamless user experience across devices.

Food and Restaurant Web Application   Demo Link

– Developed a fully responsive web application to showcase restaurant menus, locations, and contact information.
– Leveraged modern UI principles with HTML, CSS, and JavaScript for an engaging user interface.
– Deployed the application on Netlify for live access, integrating design consistency and optimized loading speeds.

Fullstack To-Do Application (MERN Stack)   Demo Link

– Built a fullstack to-do application using the MERN stack (MongoDB, Express.js, React, Node.js)
– Designed a responsive user interface with React, incorporating modern styling techniques for an intuitive experience.
– Integrated JWT-based user authentication for secure access to personalized to-do lists.
– Implemented backend API endpoints with Node.js and Express.js to handle CRUD operations.
